

# Lake Visitors

[www.ProtectYourWaters.net](http://www.ProtectYourWaters.net)

- **Clean** - Remove all plants, animals, mud and thoroughly wash everything, especially all crevices and other hidden areas.
- **Drain** - Eliminate all water before leaving the area, including wells, ballast, and engine cooling water.
- **Dry** - Allow sufficient time for your boat to completely dry before launching in other waters.

If your boat has been in infested waters for an extended period of time, or if you cannot perform the required steps above, you should have your boat professionally cleaned with high-pressure scalding hot water (>140°F) before transporting to any body of water.
