Water Conservation in the home- In 2024 each month we will have a water conservation tip that might help reduce your water bill. This month's tip is for the bathroom sink. **Minimize Use of Kitchen Sink Garbage Disposal Units.** In-sink 'garburators' require lots of water to operate properly, and add considerably to the volume of solids in a septic tank, which can lead to maintenance problems. Start a **compost pile** as an alternate method of disposing food waste. <https://learn.eartheasy.com/guides/45-ways-to- conserve-water-in-the-home-and-yard/>
