By all accounts it was a successful season!</p>
CITY BOARD REPORTS: LIBRARY: (D.3)	No report given.
CITY BOARD REPORTS: HOUSING AUTHORITY: (D.4)	No report given. Mayor Schultz indicated that the clean-up day was rainy and they didn't get as much done as they hoped. Perhaps an additional day will be scheduled. Work continues on the energy grant application. Don Bryant was asked if he could help pull out the two stumps near the SW corner of the property.
CITY BOARD REPORTS: CEMETERY BOARD: (D.5)	No report given.
CITY BOARD REPORTS: OTHER: (D.6)	No other reports were provided.
SPECIAL REPORTS: CARLA BACH DISCUSS SPEEDING ON MAPLE STREET: (E.1)	Carla Bach discussed her concern about the speed limit on Maple Street. Mrs. Bach indicated that she felt 20 MPH was difficult to maintain, would it be better to increase the speed limit to 25 and enforce it more strictly? The Council thanked her for her input. No action was taken.
SPECIAL REPORTS: TIM SCHWERDT AFLAC PRESENTATION: (E.2)	Tim Schwerdt and a co-worker presented information about AFLAC for the employees and council to review. No action was taken. Tim will call Jim Koger to discuss further.
PROJECTS IN PROCESS: SEWER-PHASE 2: (F.1)	Vic Robbins gave his report. There was discussion about what remained to be done by King's Construction. Items included restoration of the borrow pit and the sludge storage. There was also a water level control weir that needed adjustment. The subcontractor will be working on the fencing as well. Pay Application #3 was discussed next. With one more change order yet to be processed (in the approximate amount of \$30,000); belief was that we were still close to \$100,000 under budget. PROJECTS IN PROCESS: WATER SYSTEM IMPROVEMENTS (F.2a)	Vic Robbins discussed the status of the Water System Improvement Project. He recently went over the final items with Heartland Midwest and Mayor Schultz. We will soon receive the as-built plans from Brian McDermott. There are some soil test density questions as well. Seeding and Mulching was done late but in a workman-like fashion. Vic feels that the stabilizing of the run-off channel has now been properly addressed. Discussion continued in regards to the project cost. Add-ons and contingencies (such as unknown, unmapped water services that were encountered); including the 8 additional valves as well as 100 feet of additional

	<p>pipng that was done, and has the final amount of the project coming to \$178,833.00. This is approximately \$14,000 over budget (on construction only). The notice of substantial completion has been issued. Heartland's pay request for \$49,539.50 would get them to 95% paid. Regarding the final retainage, if the council gave the Mayor authority to pay once the items meet Vic's approval (\$8,941.67) we wouldn't have to wait until next meeting. Dorthy Chikly (Jim Gates) moved to pay the \$8,941.67 once Vic gave his approval. There was additional discussion. Vic indicated we would also need lien releases from all of their suppliers. So noted. Motion carried 3-2 (Brady, Goodyear).</p>

With two blocks left to pave the ton overage is believed to be not as great as what was previously thought, however final details weren't yet available. Jon Brady questioned how RD Johnson was selected as a subcontractor- in particular who got the bids from which they were selected. Vic believed that the prime contractor got the quotes and went with who they wanted to pick. Jon indicated that he thought we could have saved considerable money by including a local contractor in the bid process. The consensus of the Council was that they would like to see an estimate of the remaining costs (including engineering) by the next Council Meeting. Jon Brady also asked about a close-out list. With this further information we can discuss requests for payment. The monitoring meeting with the Department of Commerce will be in December. Donna Crawford will assist.</p>

NEW BUSINESS: PARK PROJECT UPDATE: (H.5)	Jon Brady discussed the bridge at the City Lake. DWR will require an application to modify the dam structure. Consensus was that the City should sign the application with PRIDE paying the application fee as part of the grant match. Jon has been working with Kim Feldkamp from DWR. The plan for the bridge is an 82 foot free-spanning bridge. As in other parts of this project, the City will front the purchase and then be reimbursed through the grant proceeds. <p>CITY CLERK REPORT: (C.2)</p>	<p>Jim Koger presented his report. There was discussion about test results at Well#4. The recent positive E-Coli test was most likely a result of a sample collection issue. The clean-out had to be dug up and flushed before the sample was taken. We will be meeting with Vic Montgomery from KDHE next week to discuss the sample taps and the sampling that we will need to do as a result of this positive test. It is important to note that samples further on in the system have been negative for E-Coli.</p> <p>Payment arrangements for two utility customers were discussed next. Bruce indicated there was approximately \$20,000 more in engineering yet to be billed for the street project. Additional discussion led to the recommendation that we not do additional street paving until next spring, understanding that under the terms of our grant and contract it is not an issue to wait. We are still in conversation with the County in regards to whether the overlay on Maple meets their specifications. The punch list will need to be completed as well. There was discussion regarding cost of the remaining items as compared to the remaining available funds. Concern over paying twice for labor, materials and engineering was raised over the possible Maple St. additional overlay and for the work in front of the school. The project monitoring will take place on December 21st. Punch list items were discussed. There was also some discussion about concerns about the project. With the number of changes that took place, it would have behooved all of us to get more items in writing. Straighter edges/transitions were discussed as well as the amount of remaining loose gravel in areas that were chip and sealed. The amount of retainage was discussed next. The most recent pay request from Little Joe's would take them to a balance of 5%, which by contract they could request once the project had been deemed substantially completed. Following discussion about whether the project was substantially completed, Dorthy Chikly (Jim Gates) moved to conditionally approve the pay request at 5% if we received the following:</p> <ol style="list-style-type: none"> 1. One weir plate is not working correctly at the lagoons and there is fence work and seeding and mulching to be completed. The area south of the lagoons is in much better shape than before. There will be some additional engineering cost as Vic will need to send in a land application form to KDHE and the O&M Plan has yet to be completed. This plan will need to be submitted to KDHE. Vic is still in conversation with Insituform in regards to the thickness of the liner. Vic is also reviewing the final inspection tapes to come up with a list of service connections that may need to be grouted. Vic estimated 12 to 15 possibilities at a cost of approximately \$1,500 each. There was discussion next about the sewer for the Overbrook Bible Church. Vic will check to see if this can be part of the project. Vic will also look in to the possibility of using later lining as an alternative. Change Order #6 to land apply sludge was discussed next. With some fencing and seeding left to be done, the cost of the project is approaching \$750,000. We would still have grant administration costs to pay out of the \$820,000 project. We will also need an amended contract (approximately \$35,500) for the last change order. There was discussion about the possibility of more expense due to the open issue with Insituform. Bruce Rinkes will get with Patty Hylton to work through project expenses. Bruce will also forward the amended contract once it is completed.
